

Summary

Fullstack Software Engineer with hands-on experience building modern web applications using **Next.js**, **React**, **TypeScript**, **Java**, and **Spring Boot**. Background in API design, authentication, payment integrations, and cloud deployment.

Experience

- 05/2026– **Software Engineer**, *Marex Group*, Brăila, Romania, On-site
Present
 - Built a Romanian payroll engine with **Spring Boot** and **PostgreSQL**, converting attendance and contracts into gross/net pay, tax deductions, and D112-ready output.
 - Shipped **Next.js** workflows for attendance, payroll simulation, and approval, with multi-company access, live salary recalculation, and reusable UI components.
 - Automated compliance-heavy salary logic (CAS/CASS, deductions, negotiated net, bonuses) so payroll runs from approved pontaj instead of manual spreadsheets.
- 09/2025– **Fullstack Software Engineer**, *Electronic Professional Design*, Brăila, Romania, On-site
03/2026
 - Architected backend services with **Spring Boot**, including authentication, HTTP-only session cookies, and Stripe payment workflows backed by **PostgreSQL** schemas.
 - Delivered **React** and **Next.js** features with server-side rendering (SSR), client state management, reusable components, and cached API data fetching.
- 10/2023– **Fullstack Developer Intern**, *.msg Systems*, Cluj-Napoca, Romania, On-site
01/2024
 - Built bug reporting and ticket status tracking on the backend, delivering an MVP adopted by 10+ internal QA testers.
 - Created **React** frontend flows with controlled issue submission forms, dynamic ticket filtering, and REST API synchronization.
- 06/2022– **Android Developer Intern**, *Yopeso*, Cluj-Napoca, Romania, On-site
10/2022
 - Collaborated on an event-scheduling app used by 3+ internal teams to streamline calendar coordination.
 - Built UI components with **Jetpack Compose** for calendar scheduling and event management.

Education

- 10/2022– **B.Sc. in Computer Science**, *Babeș-Bolyai University*, Faculty of Mathematics and Informatics,
06/2025 Cluj-Napoca, Romania

Personal Projects

- 10/2025– **Sudexpert SRL — E-commerce Platform**
02/2026 <https://www.sudexpert.ro>
 - Designed and deployed a full-stack e-commerce platform using **Next.js** and **Spring Boot**.
 - Established secure authentication flows and integrated **Stripe** payment processing.
 - Containerized backend services with **Docker** and deployed on **AWS ECS**, **AWS Amplify**, and **AWS RDS**.
 - Built RESTful APIs with PostgreSQL-based data persistence.
- 03/2025– **MoonSol — Solana DeFi Platform**
06/2025 <https://www.moonsol.io>
 - Engineered a decentralized finance platform on the **Solana** blockchain using **Next.js** and **TypeScript**.
 - Integrated wallet connections, token operations, and on-chain transaction workflows with **Solana Web3.js**.
 - Connected **Raydium**, **Metaplex**, and **IPFS** for liquidity, asset management, and decentralized storage.
- 01/2025– **Social Melody — Android Music Streaming Application**
06/2025 <https://github.com/a-bjn/social-melody>
 - Built an Android music streaming application using **Kotlin** and **Jetpack Compose**, integrating the **Spotify Web API** with OAuth 2.0 authentication.
 - Shipped real-time social and location-based features using **Google Maps APIs** and collaborative listening, validated with 12+ live beta testers.

Technical Skills

Frontend Next.js, React, TypeScript, Tailwind CSS

Backend Java, Spring Boot, PostgreSQL, SQL, JWT
